## 1. Introduction and Methods

This report summarises the feedback obtained from surveys of employers of APTC graduates 6-12 months after they completed their studies with APTC. This timeframe allows graduates time to re-join the work force and demonstrate the outcomes of their training. The information in the report was gathered by administering the “APTC Employer Questionnaire”, and focused on gathering information from those companies or individuals who have employed or still employ APTC graduates before and/or after their study.

Employers included in the survey were identified from the application forms returned by applicants wishing to study with APTC. Surveying remote participants in areas such as Marshall Islands, Kiribati, and Niue) was conducted via post and through emails. In addition, APTC officers also visited local area employers at their premises to administer the survey the method of data collected has proven to be the most successful survey method.

The data gathered focuses on basic evidence about the employee and placement within their industry. The survey questions seek information on:

- ▶ General employer information
- ▶ Employer assessment of graduates in terms of:
  - ▶ technical development
  - ▶ personal and professional development

Information contained within this report augments data gathered via the APTC Graduate Student Tracer survey to provide a broader view on the effects of APTC training on students and their industries.

## 2. Survey Administration and Feedback

The survey was distributed between 1 February and 30 April 2013. The survey collection period ended 31 July 2013. The survey population consisted of 343 employers, based on the principle that each employer was allocated only one survey regardless of the number of the APTC graduates in their employ. The total number of graduates relevant to the survey was 835. A total of 123 completed surveys were collected by APTC staff. Table 1 below provides a listing of the surveys administered and the returns from each country.

It should be noted that the efficient administration and return of surveys was affected by the remote locations of respondents, and on the transient employment of students – many had left their place of employment between their graduation and the survey implementation.

Survey Country	No. of Surveys Administered	No. of Completed Returns	Percentage Returns
<b>Fiji</b>	82	33	40%
<b>Kiribati</b>	6	6	100%
<b>Marshall Islands</b>	1	1	100%
<b>Nauru</b>	3	0	0%
<b>Niue</b>	1	0	0%
<b>PNG</b>	67	19	28%
<b>Samoa</b>	30	10	33%
<b>Solomon Islands</b>	79	17	22%
<b>Tonga</b>	7	2	29%
<b>Tuvalu</b>	4	0	0%
<b>Vanuatu</b>	63	38	60%
